🐙 [Github](#) | [LeetCode](#)

OBJECTIVE

B.Tech Computer Science student, strong in Data Structures, Algorithms, and Full-Stack Development. Experienced in building scalable backend systems, ETL pipelines, and responsive web applications using Java, React, and AWS.

EDUCATION

Poornima Institute of Engineering and Technology (PIET), Jaipur | 2023–2027

B.Tech in Computer Science | **CGPA: 9.42** (till 5th semester)

EXPERIENCE

Software Developer Intern | Vaibhav Global Limited | June - July 2025

- Designed and implemented RESTful APIs with JSON-based schemas and CRUD operations for inventory systems.
- Built ETL pipeline processing **10k+** records, reducing billing errors by 95% and improving data accuracy.
- Engineered scalable data flow with real-time stock synchronization.
- Followed SDLC practices and participated in code reviews and debugging for backend modules.

Frontend Developer Intern | QDOM Technologies | June 2024

- Developed a responsive electric car e-commerce website using HTML, CSS, and JavaScript.
- Built reusable and responsive UI components using React, improving maintainability and cross-browser compatibility.
- Optimized UI layouts and styling, improving page performance by 25% and enhancing user experience.

PROJECTS

Inventory Billing System 📁 | **Vite, React, TypeScript, Tailwind CSS, JSON | June 2025**

- Designed JSON schemas, CRUD operations, and ETL pipeline for inventory transformation.
- Built scalable React architecture with real-time stock synchronization and Vercel deployment.

InsightX – ML Regression Model | Python, Pandas, Scikit-learn, Kaggle | January 2026

- Engineered end-to-end ML pipeline from ingestion to evaluation; ranked 4th in Kaggle competition.

Faculty Management System 📁 | **HTML, CSS, JavaScript | September 2024**

- Implemented client-side persistence and multi-entity rendering for faculty, schedule, and attendance.

SKILLS

Languages: C, C++, Java, Python, JavaScript, TypeScript

Frontend: HTML5, CSS3, Responsive Design, Cross-platform Components, React.js, Vite, Tailwind CSS, Bootstrap, Material Design, React Hooks, CSS optimization, component-based styling

Backend & Data Engineering: ETL pipelines, data cleaning and transformation, JSON schemas, SQL (PostgreSQL/MySQL-compatible), Pandas, Scikit-learn, real-time state synchronization

Coursework: Data Structures & Algorithms, Object-Oriented Programming, AI/ML, Database Management Systems

Cloud & DevOps: AWS (EC2, RDS, S3), Git, GitHub, Vercel, Netlify

Tools: VS Code, Figma, Canva

Soft Skills: Public Speaking, Teamwork, Leadership, Volunteering

ACHIEVEMENTS

- Completed Google Cloud Career Launchpad – Cloud Engineer Track
- Ranked **4th** in InsightX Kaggle ML Competition for building an end-to-end regression model.
- **NPTEL Silver Medallist:** Fundamentals of OOP (C++, Java, Python)
- **NPTEL Certified:** Data Structures and Algorithms using Java
- Solved **165+ problems** on Leet-Code (Data Structures & Algorithms)

EXTRACURRICULAR

- **Captain**, AWS Cloud Club at PIET Jaipur – Academic Year 2024–25
- Volunteered as part of the Content & Hospitality Team in the college annual cultural fest, 2024–25
